Shandong's First List of Producer Services Cooperation Opportunities (2026–2030)

Serial Numbers	Regions	Opportunity Names	Industry Categories	Opportunity Description	Investment Amounts (USD	Requiring Parties	Contact Persons & Information
1	Jinan Start-up Area	Headquarters Base of Northern Seed Industry	R&D Design and Other Technical Services	The project occupies a total land area of approximately 61 mu, with a total construction floor area of around 190,000 m². Positioned as a hub for pooling modern agricultural innovation resources and corporate headquarters, as well as an incubation base for translating scientific and technological achievements into real-world applications, it aims to develop into a National Modern Agricultural Sci-Tech Innovation Center. Capitalizing on the development opportunities of the Jinan Start-up Area for Old-to-New Growth Drivers Conversion, the project focuses on large-scale agricultural production and operation centered on modern agriculture and the seed industry. It builds a full-chain industrial ecosystem framed as " 100-mu Sci-Tech Innovation Port – 1,000-mu Agricultural Innovation City – 10,000-mu Demonstration Zone": the headquarters base functions as the core R&D hub; the 1,000-mu Agricultural Innovation City delivers pilot-scale transformation, smart manufacturing and industrial enabling services; and the 10,000-mu Demonstration Zone provides venues for breeding trials, demonstrative cultivation and achievement rollout. This creates a complete closed loop of "R&D – pilot testing – demonstration – promotion" to support whole-chain innovation and industrialization within the seed industry.	26,866	Jinan Chengfa Beiqi Investment and Development Co., Ltd.	Xiao Fengjie: 15668362473
2	Lixia District, Jinan City	Changling Zhigu Project	Business Services	Located south of the intersection of Jingshi Road and Fengshan Road in the Changlingshan area, the project boasts a total construction floor area of approximately 65,000 m² and consists of four commercial office buildings. Drawing on the biomedical and electronic information industrial clusters of Changlingshan, the project targets headquarters enterprises in biomedicine, information technology and finance, as well as producer-service enterprises covering industrial software, enterprise digitalization, industrial consulting, supply-chain finance and other sectors. It aims to develop into a cluster carrier for sci-tech innovation-oriented producer services.	15,493	Jinan Limao Construction and Development Co., Ltd	Yang Longfei: 13256680204
3	Pingyin County, Jinan City	Northern Cultural and Creative Base	Business Services	As a key benchmark project in Jinan, the Northern Cultural and Creative Base has a total investment of RMB 210 million. It is located in Jinan Information Industry Base, Pingyin County. The first phase features a factory building of approximately 10,000 ㎡. The project builds an integrated end-to-end system. At the front end, it develops an immersive experience complex and IP exhibition spaces. At the mid-end, the Tangying Intelligent Ecosystem Platform gathers hundreds of original IPs. At the back end, it hosts the world's first flexible automated production line for cultural and creative products, mainly for the manufacturing of trendy toys.	3,134	Jinan Peijin Cultural Creative Co., Ltd	Li Lei: 15965980607

4	Licheng District, Jinan City	National Supercomputing Jinan Center Science and Technology Park	Information Service	With a total construction floor area of approximately 640,000 m² and a leasable operational area of 450,000 m², it is the first science and technology park in China named after supercomputing. It delivers high-quality service support covering high-performance computing, AI computing, cloud computing, industrial simulation computing, data storage and backup, software and information technology services, computing power and its applications, network and data security, and artificial intelligence.	-	Jinan Licheng Holding Group Co., Ltd.	Licheng Holding Digital Industry Group: 0531-86909968
5	Jinan Innovation Zone	Jinan Industrial Software Research Institute Project	Information Service	Located in the Industrial Software Building of Jinan High-tech Zone, Shandong Province, the project has a floor area of 14,700 m². Built upon Huatian Software's core strengths in self developed 3D CAD — underpinned by two independent kernels: the 3D geometric modeling engine and the constraint solving engine — and leveraging CrownCAD, its cloud native 3D CAD product, the project collaborates with leading industrial players. It targets key generic technologies for core industrial software represented by 3D CAD, expands along the full industrial software value chain, develops core industrial software and supporting solutions, and supplies talent and technical backing to foster core competitiveness for China's smart manufacturing. Potential cooperation models include technical partnerships, joint laboratories, joint innovation centers and other co development arrangements to incubate and accelerate growth within the industrial software sector.	4,478	Jinan Industrial Software Research Institute	Qi Tiancheng: 18866863399
6	Jinan Innovation Zone	Public Service Platform for Cell and Gene Testing	R&D Design and Other Technical Services	The park focuses on the cell and gene industry. Led by Yinfeng Biological Group, it gathers Qilu Stem Cell, WZ Biosciences, BellaGen and Pantheum, with key focus areas in cell banking, genetic testing and plant gene editing. Centered on Zhangjin Area, it has formed a full-value-chain ecosystem covering cells, genes and supporting equipment: upstream banking, midstream preparation and downstream application. Cooperation options include technical partnership, introduction of high-end talent and investment.	745	Jinan Innovation Zone Entrepreneurship Service Center	Wang Shenfang: 19953123731
7	Licheng District, Jinan City	Low-altitude Operation Service Application Station Project	Cargo Transportation, General Aviation Operations, Warehousing and Postal Express Services	Adopting a dual-drive model of "hardware sharing + software empowerment", the project achieves deep integration between automated airport facilities (including drones) and a drone data platform to develop an integrated "terminal network cloud" management system. Following the intensive development philosophy of "build once, share across domains", it facilitates the rollout of application scenarios including "low altitude + emergency rescue" and "low altitude + environmental monitoring", and fosters a sustainable model for in-depth integration of the low-altitude economy and social services. Multiple cooperation modalities are available, including market-based, capital and technical collaboration.	1,493	Times Low-Altitude Industry (Shandong)	Wang Cuijun: 18615452990

8	Licheng District, Jinan City	Jinan Iron and Steel Aerospace Special Alloy Material Research and Application Pilot Base Project	R&D Design and Other Technical Services	The project plans to establish one key laboratory for process design simulation, alloy material preparation, and the testing, analysis and evaluation of material microstructures, mechanical properties and physicochemical properties. It will deliver comprehensive testing services and technical support for quality control of pilot line products. The project will also set up three dedicated pilot production lines: aluminum alloy smelting and low pressure casting, small aluminum alloy and titanium alloy fasteners, and isothermal forging of titanium alloys. This forms a closed loop system of "process R&D – pilot verification – machining & manufacturing – market application", with capabilities for fast response delivery and verification of multi specification, small batch products, to support innovative application of new materials and technologies in the aerospace sector.	1,464	Shandong Jigang Taihang Alloy Co., Ltd.	Yang Xingyou: 13793108945
9	Changqing District, Jinan City	Jinan Kangle Guard· Innovative Vaccine Technology Platform and Industrialization Base Construction Project	R&D Design and Other Technical Services	With a total investment of about RMB 1.5 billion, the project will be carried out in two phases. Phase I will repurpose part of the factory buildings within Changqing Biomedicine Valley, mainly to construct platforms for vaccine adjuvants, R&D and production of associated reagents, CHO cell expression technology, and mRNA R&D technology. Phase II is planned for a roughly 101 mu plot on the southern side of the park, dedicated to the R&D and manufacturing of human innovative vaccines including respiratory syncytial virus (RSV) vaccine and herpes zoster vaccine, as well as vaccine adjuvants, antibody reagents and other related products.	22,388	Kangle Guard (Jinan) Biopharmaceutical Co., Ltd.	Zhang Yawei: 13153608982
10	Huaiyin District, Jinan City	Shandong Digital Finance Industrial Park	Financial Services	Located at No. 2751 Rizhao Road, Xingfu Sub-district, Huaiyin District, Jinan, the park covers a total land area of 59,495.33㎡. • Talent services: Home to the "Huaiyin Talent Empowerment Hub", it develops the "Qilu Gateway" talent brand and provides empowerment services for talents of the "West Development" initiative. • Financial support: Designated as Jinan Private Equity Agglomeration Zone by Jinan Local Financial Regulatory Bureau, it has attracted RMB 700 million of actual investment. It hosts regular government-bank-enterprise matchmaking activities to facilitate financing. • Infrastructure: Adjacent to Jinan West Railway Station. Facilities including roadshow rooms, meeting rooms, VIP lounges and negotiation rooms are available for roadshows, conferences and live streaming.	-	Shandong Guoqin Luzhong Industrial Park Operation and Management Co., Ltd.	Song Yuanyuan: 18453160891

11	Laixi City, Qingdao City	R&D of AI-enabled Platform for Enterprise Data Interconnection and Intelligent Operational Decision-Making	Information Service	It applies AI to intelligent operations management, integrating ERP, CRM and IoT device data to achieve full-domain data connectivity. It develops dynamic prediction models based on deep-learning algorithms and deploys an intelligent decision engine to support automatic generation and dynamic adjustment of orders, contract management, resource scheduling, inventory optimization and production scheduling. This delivers an over 20% improvement in operational efficiency and a 30% reduction in labor-intervention costs.	-	Qingdao Jinxiu Qiancheng Energy-saving Glass Co., Ltd.	Manager Li: 13395362199
12	Pingdu, Qingdao	Enterprise Application of Humanoid Robots	R&D Design and Other Technical Services	For intelligent production scenarios such as machining, assembly and packaging, we target tasks that conventional articulated robots cannot easily handle. We wish to partner with robot developers and manufacturers to create new intelligent equipment with automatic detection, analysis and control functions, and build flexible automated lines tailored for new-generation smart factories.	150	Qingdao Desheng Machinery Manufacturing Co., Ltd.	Manager Wang: 15315001566
13	Chengyang District, Qingdao City	Carbon footprint certification for key industrial products and public services for green overseas expansion	R&D Design and Other Technical Services	Targeting the green low-carbon transition of Shandong's export-oriented new energy, chemical and traditional competitive manufacturing industries, CQC delivers one-stop carbon services including carbon footprint calculation, carbon labelling certification, CBAM compliance and international conformity assessment mutual recognition. The services support suppliers of multinationals based in Shandong and local export enterprises, helping them overcome green trade barriers and reduce institutional supply-chain costs.	-	China Quality Certification Center Co., Ltd. Qingdao Branch (CQC Qingdao)	Meng Xin: 0532-67735606 Zheng Tianyu: 17660626172
14	Chengyang District, Qingdao City	Product Certification and Import & Export Public Services	R&D Design and Other Technical Services	Focusing on the compliance needs of 19 iconic industrial chains in Shandong Province and the supply chains of multinational corporations, the China Quality Certification Center provides one-stop services for multinational corporations' factories in Shandong and local supporting enterprises, covering domestic and international certification, quality evaluation, technical barriers to trade response, international mutual recognition of conformity assessment, and compliance counseling, thereby reducing the institutional transaction costs of multinational corporations' supply chains.	-	China Quality Certification Center Co., Ltd. Qingdao Branch	Meng Xin: 0532-67735606 Zheng Tianyu: 17660626172
15	Qingdao SCO Demonstration Zone	SCO Cross-border Trade Data Circulation Platform Development	Information Service	It advances secure and efficient cross-border data flow for use cases such as cross-border e-commerce, cross-border manufacturing and remote education. The initiative aims to improve cross-border data circulation infrastructure, establish a service system defined by "collaboration, scalable flow, efficient utilization and trust-based compliance", and foster a SCO-specific cross-border data industry ecosystem.	370	Qingdao SCO Airport-Adjacent Holdings Development Group	Gao Ke: 0532-82289537

Serial Numbers	Regions	Opportunity Names	Industry Categories	Opportunity Description	Investment Amounts (USD	Requiring Parties	Contact Persons & Information
16	Pingdu, Qingdao	Smart Sea Urchin RAS Industrial Farming Demonstration Scenario	R&D Design and Other Technical Services	For sea urchin hatchery and grow-out production, we welcome real-site demonstration of RAS technology. Our pilot tanks and full RAS prototypes are available for partners to run process tests and collect data. The open demonstration setting will support optimization of water quality-feeding linked control, on-site data acquisition across various operating scales, retrofitting plans for existing farming sheds, and ultimately a replicable full-set solution.	-	Qingdao Baoyufeng Marine Technology Co., Ltd.	Manager Jiang: 13869817885
17	Shibei District, Qingdao City	Smart Fire Protection Platform Upgrade & Government-Enterprise Scenario Rollout	Information Service	We seek cooperation in AI intelligent algorithms, IoT hardware adaptation and digital-twin visualization technology. Our goal is to optimize the smart fire protection platform's intelligent identification of fire hazards and fire prediction & early warning models, improve compatibility for the access of multi brand fire fighting equipment, and strengthen the dynamic simulation capabilities of digital twins for fire protection scenarios. The project also conducts technical alignment for government enterprise digital systems, jointly scales up the deployment of smart fire protection scenarios, and consolidates the technical moat and market competitiveness of its products.	-	Qingdao Tongren Building Fire Protection Co., Ltd.	Manager Yu: 18561977669
18	Licang District, Qingdao City	Qingdao Centralized EV Battery Swap Station	Cargo Transportation, General Aviation Operations, Warehousing and Postal Express Services	The project will develop 100 integrated centralized battery swap stations in Qingdao in two phases. Phase I deploys 25 demonstration stations in Licang District, covering key sites including large residential compounds, commercial areas, industrial parks and metro hubs. It validates hardware, the smart supervision platform and operation models end to end to produce a standardized, replicable template. Phase II adds 75 stations across all districts to build out a city wide EV battery swap service network.	247	Qingdao Haichuang New Energy Development Group Co., Ltd.	Song Zhenhao: 13953220762
19	Zibo High-tech Zone	Lightweight 7-Axis Humanoid Robotic Arm	R&D, Design and Other Technical Services	Shandong Zhixing Intelligent Body Co., Ltd. specializes in embodied intelligence with full-spectrum services. Its integrated business covers application promotion, OEM production and supply chain support to satisfy varied partner needs. The lightweight 7-axis humanoid robotic arm adapts to precision assembly, sorting, human-robot collaboration and other industrial use cases. The product is under market expansion, and prospective customers and ecosystem partners are welcome to collaborate.	300	Shandong Zhixing Intelligent Body Co., Ltd.	Liu Hao: 13181940910
20	Zibo High-tech Zone	Four-wheel-steering Mobile Platform	R&D, Design and Other Technical Services	Shandong Zhixing Intelligent Body Co., Ltd. specializes in embodied intelligence with full-spectrum services. Its integrated business covers application promotion, OEM production and supply chain support to satisfy varied partner needs. The four-wheel-steering mobile platform adapts to indoor and outdoor inspection, material handling, mobile manipulation and other use cases. The product is under market expansion, and prospective customers and ecosystem partners are welcome to collaborate.	300	Shandong Zhixing Intelligent Body Co., Ltd.	Liu Hao: 13181940910

21	Boshan District, Zibo City	Pump Industry Cross-border E-commerce & Integrated Foreign Trade Service Platform	Wholesale, Trade Brokerage and Agency Services	Built on Boshan's strength as "China Pump City", the Electromechanical & Pump Industrial Park develops a one-stop foreign trade service platform for the pump sector, covering cross-border e-commerce incubation, overseas warehouses, global marketing, customs clearance, FX settlement, tax rebate and financing. It offers cross-border e-commerce, integrated foreign trade, freight forwarding and overseas warehouse services to help pump and supporting suppliers enter global markets and boost exports of liquid ring vacuum pumps and high-end chemical pumps. Relevant enterprises are welcome to settle in the park.	500	Boshan District Electromechanical & Pump Industrial Park	Wang Tong: 0533-4152173
22	Shizhong District, Zaozhuang City	Cross-border Trade Platform for China-foreign Pre-owned Brand Merchandise	Wholesale, Trade Brokerage and Agency Services	Leveraging the nation's first pilot for pre-verification of IP rights for pre-owned goods (customs IP confirmation) and compliant declaration, the park will launch a cross-border trade platform for pre-owned branded products such as luggage, watches, sneakers, apparel and 3C electronics. Embedding IP pre-confirmation into the full trade chain, the platform offers one-stop services: IP pre-verification, compliant export clearance, trade matching, overseas channel sourcing, cross-border settlement and after-sales services. It addresses pain points including customs IP alerts and cargo seizure for pre-owned brand exports. Partners including overseas retailers, cross-border e-commerce platforms, IP & legal firms, overseas warehouse/logistics operators and commercial factoring providers will be recruited to build a global distribution and compliance service network.	100	China (Zaozhuang) International Circular Digital Economy Park for Pre-owned Goods	Shan Deyu: 18263781056
23	Dongying Economic & Technological Development Zone	Dongying Yishulian (AI) Industrial Park Project	Information Service	Dongying Yishulian (AI) Industrial Park is located at 118 Dongliu Road, Dongying Economic and Technological Development Zone, covering an area of about 38,500 m² (around 57.77 mu) with a total floor area of 66,200 m². The park consists mainly of nine high grade R&D office buildings and supporting green spaces, including 52,200 m² above ground and 14,000 m² underground. It targets three core industrial tracks: artificial intelligence, foreign trade and flow economy. For the AI sector, the park prioritizes AI chips, big-data platforms and IT innovation product manufacturing to build a pioneer zone for the data-element industry. For foreign trade, it pursues coordinated development alongside local foreign trade enterprises in Dongying to form an industrial cluster. For the flow economy, it focuses on emerging business formats such as e commerce to expand industrial scale and lift overall competitiveness.	-	Dongying Yishulian (AI) Industrial Park	Pang Jing: 15666387939 Hu Jinfeng: 13181989490
24	Guangrao County, Dongying City	Guangrao Logistics Park Warehousing and Logistics Project	Cargo Transportation, General Aviation Operations, Warehousing and Postal Express Services	Built under the model of government-led planning, public-private joint development and diversified investment, Guangrao Logistics Park follows the " planning, construction and project recruitment simultaneously " approach. It features four functional zones and one center: industrial logistics, cargo transshipment, railway freight, comprehensive business and distribution center, to advance its modern logistics system.	-	Guangrao Logistics Park	Chen Zaibing: 18805460616

25	Dongying Economic & Technological Development Zone	Wind Power Equipment Testing & Certification Innovation Base	R&D Design and Other Technical Services	Specialized testing & certification facilities for wind turbines, core components and key materials will be constructed. Twelve high-power offshore wind test stands and supporting infrastructure are available to support full-process and multi-item tests for wind turbines up to 20 MW. Serving institutions such as CEPRI and CGC, and OEMs including Dongfang Electric, the base eases the shortage of testing resources and scattered certification workflows with standardized services. It strengthens the local industrial chain and serves as a regional wind power innovation hub. Testing labs, turbine makers, supporting suppliers, universities, research bodies, industrial service providers and international partners are welcome.	22,272	Dongying Economic and Technological Development Zone	Hu Mingli: 13954677779 Hu Jinfeng: 13181989490
26	Yantai Economic and Technological Development Zone	Cishan·AI Valley	R&D Design and Other Technical Services	Cishan·AI Valley serves as Yantai's pilot zone for the AI industry. Located at 498 Changjiang Road, Yantai Economic and Technological Development Zone, it sits within the core section of the Huancishan International Research Corridor. Developed and built by Yeda Jingfa Group with a total investment of RMB 1.8 billion, the park covers approximately 187 mu. The park is planned into three functional zones: R&D office, industry research incubation and living services. The valley functions as a high end platform for pooling research resources, incubating sci tech achievements and fostering emerging industries. Strategically, it aims to build a global hub for full scenario AI innovation and cooperation, a national benchmark demonstration zone for integrated intelligent manufacturing and AI applications, and a core growth driver for Shandong's AI industry. The park develops a full chain industrial ecosystem framed as "R&D & design – incubation and translation – pilot acceleration – scenario deployment – enterprise maturation – industrial nurturing". It provides 3,000P of high quality computing power as robust infrastructure for large model training and algorithm iteration. Leveraging state owned platforms including Guofeng Group, it has established a "1+3+N" fund matrix with an aggregate scale exceeding RMB 10 billion to deliver full lifecycle capital support for AI enterprises. Current investment promotion priorities cover five directions: AI models and algorithms, data corpora, intelligent agents, AI software and hardware, and AI security services.	26,865	Yantai Commerce Bureau	Su Hui: 0535-6636763
27	Muping District, Yantai City	Blue Pharma Valley · Life Island	R&D Design and Other Technical Services	Blue Pharma Valley · Life Island serves as the core engine and "Project No.1" under Yantai's "1+3+X" spatial layout for the biomedicine industry. It is developed and operated by Yantai Biomedicine & Health Industry Development Group, an entity established by Yantai Guofeng Group. Situated alongside the Qinshui River in Muping District, within the core of the Yantai Weihai integration zone and close to the Rongwu Expressway and Muping High speed Railway Station on the intercity line, the site has a planned area of 3.2 km², a total investment of RMB 12 billion, and a total construction floor area of approximately 1.3 million m². The north island hosts high-end R&D and supporting production living facilities; the South Island focuses on medical isotopes and radiopharmaceuticals; the East Island on cell and regenerative medicine; and the West Island on the immunity economy. The park hosts R&D and pilot platforms including the provincial new drug creation laboratory, the cell product pilot translation platform and the bio fermentation pilot platform. It also accommodates inspection and approval platforms such as the food and chemical testing sub center, regional radiopharmaceutical testing center, cell product testing center, and the Yantai sub center for review and inspection under the Shandong Medical Products Administration. A RMB 10 billion mother fund for biomedicine and health industry development has been launched to form a full chain closed loop of "R&D – pilot testing – inspection & approval – manufacturing – sales". We focus on attracting investments on medical isotopes & radiopharmaceuticals, cell & regenerative medicine, immunity economy, future food, synthetic biology, medical aesthetics & anti-aging, and medical equipment. We welcome enterprises to invest in Yantai and jointly build a biomedicine full value chain park with an output scale of tens of billions of RMB.	179,104	Yantai Commerce Bureau	Su Hui: 0535-6636763

Shandong's First List of Producer Services Cooperation Opportunities (2026–2030)

28	Yantai City	Dingzi Bay New Energy Innovation Zone (National Zero-carbon Park)	Energy Conservation and Environmental Protection Services	Spanning Haiyang and Laiyang in Yantai, Dingzi Bay New Energy Innovation Zone covers 596 sq. km of land area and 2,150 sq. km of sea area. It is a key platform of Shandong's pioneer zone for green, low-carbon and high-quality development, one of the first national zero-carbon industrial parks, and a core carrier for Yantai to implement the "Dual Carbon" strategy and build a zero-carbon industrial highland. Endowed with abundant clean energy resources, the innovation zone has taken initial shape in integrated nuclear, wind, solar and energy storage systems. It hosts three nuclear power plant projects plus substantial offshore wind and photovoltaic projects, with a total installed clean energy capacity of 5.41 GW and annual power output exceeding 24 billion kWh. The zone enjoys abundant nuclear-generated steam with notable cost advantages. Its industrial steam supply capacity is expected to reach 6.3 million tons per year by 2027, and 12 million tons of high-temperature green steam annually by 2035. The green energy will continuously fuel the growth of new materials, chemical, biomedical and other industries and boost regional development. Three industrial clusters are being fostered: comprehensive nuclear energy utilization & nuclear power equipment manufacturing, aerospace (Oriental Space Port), and green new materials. New business formats including source-grid-load-storage integration, green power trading and CCER are deployed to deepen the integration of clean energy and advanced manufacturing. It aims to become a national demonstration benchmark for cascaded nuclear energy utilization and multi-energy complementation.	-	Yantai Commerce Bureau	Su Hui: 0535-6636763
29	Yantai City	Jiahe·Xingfu New City Project	Business Services	Jiahe Xingfu New City sits at the geographic center where Zhifu District, Fushan District and the Yellow-Bohai New Area converge. Positioned as a "city of living, sci tech innovation and the future" with international standards, modern vitality and an innovative mindset, it serves as the core carrier for Yantai's "one core breakthrough" strategy. Planned over 53 km², the new city boasts 41 km² of developable land, with 17,000 mu of land already released. It is master planned with seven major functional zones — the headquarters economic zone, an urban lounge and a commercial center among them — plus one Jiahe ecological corridor. Its "3+2+N" industrial framework consists of three pillar sectors (digital, green and service economies), two featured sectors (low altitude and headquarters economies), plus future industries such as humanoid robots and aerospace & space information, forming a tiered industrial ecosystem. Key carrier projects including the Xingfu New City Headquarters Base, Shenlan Talent Exchange Center and CEC Zhigu Industrial Park are under rapid deployment. Some 2,200 talent apartments are available to underpin industrial capacity and talent services. The new city prioritizes investment promotion in digital economy, green economy, service economy, low altitude economy and headquarters economy. We welcome partners to jointly build an industry city integrated demonstration new city.	-	Yantai Commerce Bureau	Su Hui: 0535-6636763
30	Zhifu District, Yantai City	Maritime World Project	Business Services	Maritime World Project is located at Zhifu Bay, Zhifu District, Yantai. Bounded by Zhifu Island to the north, Yantai Railway Station to the south, Yantai Hill and Chaoyang Street Historical & Cultural Block to the east, and Yantai's main comprehensive passenger transport hub to the west, it covers a planned land area of approximately 7.7 km². Encompassing five zones — Pier I, Pier II, Pier III, Pier IV and Huixi Street — the project will develop a business tourism complex integrating "ship, port, city, tourism, shopping and entertainment", and build the globally oriented "Window of Yantai, Eye of the City". Pier I accommodates central SOE headquarters and a marine finance complex; Pier II features a cruise home port, shipping services and MICE supporting facilities; Pier III develops the Zhifu Bay CBD and a modern service industry base; Pier IV is built into a coastal wellness new town. Zhifu Bay Plaza and Hongli Fishing Market within the Huixi Street area are already in operation. Pier I comprises 12 buildings with a total construction floor area of around 290,000 m² and is scheduled for delivery by the end of 2026. The project prioritizes businesses including marine finance, headquarters economy, cruise economy, cultural tourism, high end commerce and producer services. We invite enterprises to invest and work in Yantai and jointly build a dynamic coastal industry.	-	Yantai Commerce Bureau	Su Hui: 0535-6636763

31	Yantai High-Tech Industrial Development Zone	IVD Medical Device Industrial Park	R&D Design and Other Technical Services	Yantai High-Tech Zone IVD Medical Device Industrial Park is a provincial key project. Located north of Keji Avenue and east of Shandong International Biotechnology Park, it is developed by the state-owned platform company of Yantai High-Tech Zone. Covering an area of 200 mu with a total investment of RMB 2.5 billion, the park has a total construction area of 250,000 ㎡, including a 30,000 ㎡ R&D center, a 160,000 ㎡ manufacturing and assembly base, and 60,000 ㎡ of supporting service facilities. It aims to build a RMB 10-billion specialized park for in vitro diagnostics, and implements a “dual-park linkage” mechanism with Shandong International Biotechnology Park to form a complete closed loop from incubation to industrialization. The park focuses on core sectors such as in vitro diagnostic reagents, diagnostic instruments, and implantable & interventional devices. It is equipped with public R&D platforms and a medical device testing center, and hosts technology transformation carriers including CDMO and CRO services. It develops a full-cycle industrial cultivation system featuring “innovation platform + nursery + incubation + acceleration + industrialization”. The park prioritizes investment attraction for enterprises engaged in IVD devices and reagents, medical device R&D and design, third-party testing, clinical trial services, regulatory consultation for registration application, quality system certification, intellectual property services, pharmaceutical supply chain management, investment & financing and fund management.	37,313	Yantai Commerce Bureau	Su Hui: 0535-6636763
32	Yantai High-tech Industrial Development Zone	Aviation and Aerospace Industrial Park	R&D Design and Other Technical Services	Yantai High Tech Zone Aerospace Industrial Park serves as the core carrier of Yantai’s aerospace industrial chain and an important platform for the provincial strategic emerging industrial cluster of high-performance special equipment and core components for aerospace. It covers a planned land area of 1,000 mu, with 500 mu for the initial phase, and a planned construction area of 500,000 ㎡. The park is equipped with standard workshops, R&D buildings and public test platforms. Together with the Aerospace Information Port and Satellite Industrial Park, it forms the “One Port, Two Parks” aerospace industrial layout within the High Tech Zone. Linked with Oriental Space Port, it builds an integrated full-chain closed loop covering satellite R&D and manufacturing, satellite-level testing and sea-launch services. The park focuses on four core manufacturing tracks: satellite assembly integration, development of key on-board components, high-end aviation parts, and aerospace information application. It hosts high-level innovation platforms including an aerospace environmental reliability test center, public satellite inspection and testing platform, and micro-nano satellite innovation center. While consolidating hardware manufacturing capacity, the park actively attracts aerospace enterprises covering aerospace R&D, design and manufacturing, inspection & testing, simulation testing, aerospace big data processing, satellite remote sensing application development, technical consulting,	-	Yantai Commerce Bureau	Su Hui: 0535—6636763
33	Weifang Comprehensive Bonded Zone	Weifang Comprehensive Bonded Zone Off-Airport Air Cargo Terminal	Cargo Transportation, General Aviation Operations, Warehousing and Postal Express Services	Weifang Comprehensive Bonded Zone has signed cooperation agreements with Jinan Yaoqiang International Airport and Qingdao Jiaodong International Airport to jointly build off-airport cargo terminals. We are looking for cargo terminal operators and cargo users.	100	Weifang Comprehensive Bonded Zone Commerce Bureau	Zhang Jianxun: 18753606881

34	Anqiu City, Weifang City	Zhongchonghui Weifang Pet Industry Park	Business Services	Led by scientific and technological innovation and supported by industrial funds, the project prioritizes four leading sectors: premium pet food, pet supplies, pet pharmaceuticals and comprehensive services, forming a "3+1" industrial system. Leveraging local industrial foundations and future development plans, it will build intelligent workshops, standalone plants, together with supporting platforms for inspection & testing and intellectual property services. It aims to develop an industrial park, digital operation platform and industrial headquarters platform with an industrial scale of over RMB 50 billion. Upon completion and operation, the project will serve as a regional hub and trading center for pet food and supplies in North of the Yangtze River, as well as an innovation demonstration zone for the pet industry. It strives to build Anqiu into China's Pet Food Valley. Intended cooperation modes: technology introduction and joint development.	74,627	Zhongchonghui (Shandong) Industrial Park Co., Ltd.	Wang Jing: 18663623777
35	Fangzi District, Weifang City	Shandong Surveying & Mapping Geographic Information Park Incubation Support Center	Business Services	Located in Fangzi District, Weifang (south of Fenghe Street, both sides of Zhengtai Road). Land area: 169 mu; building area: 192,000 ㎡. 10 high-standard workshops are fully completed. It integrates incubation, office, exhibition, conference and financial services to support tech enterprises from incubation, pilot test to industrialization. Target industries: intelligent manufacturing, new energy, new materials.	74,627	Fangzi District Commerce Bureau	Liu Hongwen: 13953635519
36	Sishui County, Jining City	Sishui County Healthy Snack Food Industrial Cluster Supporting Project	Productive Support Services	Sishui County hosts 31 industrial enterprises above designated size within its modern food industrial chain, generating an above designated size revenue of RMB 6.52 billion. The county boasts a solid foundation for the healthy food industry. Nevertheless, most critical production inputs, including live poultry raw materials, food packaging, food additives and special equipment for slaughtering and processing, are sourced and transported from outside the region. Logistics, warehousing and transit losses alone add extra costs of more than RMB 10 million to local enterprises every year. The county plans to prioritize the introduction of large scale breeding enterprises and food packaging manufacturers to shore up and strengthen the modern food industrial chain by filling supply chain gaps.	5,000	CCPIT Sishui County Committee	Wang Qingtao: 15063796815
37	Sishui County, Jining City	Sishui County Livestock and Poultry Manure Resource Utilization Project	Energy Conservation and Environmental Protection Services	Sishui County is an important livestock and poultry breeding hub in southern Shandong with a solid foundation in animal husbandry. By the end of 2025, the county's livestock and poultry inventory stood at 191,000 pigs, 11,000 cattle, 89,000 sheep and 6.859 million poultry. The annual total output of livestock and poultry manure reaches approximately 708,000 tonnes, representing abundant manure resources. Aligned with national policy priorities including livestock and poultry manure resource utilization, agricultural non point source pollution control, rural revitalization, and carbon peaking and carbon neutrality, the project delivers sound ecological, social and economic benefits.	2,000	CCPIT Sishui County Committee	Wang Qingtao: 15063796815

38	Taishan District, Tai'an City	Full-chain Smart Logistics Park Project	Cargo Transportation, General Aviation Operations, Warehousing and Postal Express Services	The project has a total investment of approximately 800 million yuan and covers an area of 296.4 mu. It will develop a comprehensive smart logistics park, with supporting facilities for warehousing and distribution, cold-chain logistics and green logistics. An integrated smart supply chain management platform will be built to deliver full-chain smart logistics services. Aligned with the 15th Five-Year Plan initiative to expand and upgrade the service sector and push producer services toward specialization and higher value links, the project responds to industrial and supply chain demands. It focuses on core business forms including smart warehousing & distribution, cold-chain storage and transportation, green logistics and integrated supply chain management, helping transform traditional transportation into modern, all-in-one supply chain services.	11,940	Tai'an Taiheng Real Estate Development Group Co., Ltd.	Mi Zai Zhen: 13615389398
39	Taishan District, Tai'an City	Embodied Intelligence Data Collection Scenario Project	Information Service	We plan to jointly develop a data acquisition, annotation and training system for embodied intelligence dedicated industrial skills based on visual recognition. The system aims to achieve general applicability in special process links such as welding, riveting, grain filling into retorts and spreading-cooling, so as to realize low-cost data collection and intelligent training and reduce the deployment and application costs of embodied intelligence.	100	Pretank Process Co., Ltd	Mi Chao: 15153830063
40	Daiyue District, Tai'an City	Co-construction Project of Daiyue Chemical Industrial Park Chemical Pilot Base	R&D Design and Other Technical Services	Tai'an Daiyue Chemical Industrial Park was identified by the Shandong Provincial Government in 2018 as one of the second batch of specialized chemical parks in Shandong Province. It has a planned area of approximately 8.6 km², with 3.54 km² already developed. The park is currently home to 22 above-scale chemical enterprises, including chain-leading enterprises such as Hanwei Group (No.1 in China and No.2 worldwide in market share of choline chloride series), Xiner (its eco-friendly liquid antioxidants have broken international monopolies), and Lianhe Pesticide (ranking first domestically for five products including 2,3-dichloro-5-chloromethylpyridine). A distinctive fine chemical industrial cluster, the Characteristic Industrial Cluster for Small and Medium-sized Enterprises of Shandong Province, has taken initial shape. The pilot base plans to build pilot workshops, analytical testing centers and supporting safety and environmental protection facilities. It will provide pilot services including scale-up verification, process optimization and product testing for scientific and technological achievements in fine chemicals, pesticide intermediates, new materials and other sectors, advance in-depth integration of industry, academia, research and application, and boost local transformation of scientific and technological achievements.	2,240	Tai'an Daiyue Chemical Industry Park	Sun Qipeng: 15615386543
41	Ningyang County, Tai'an City	Tai'an Chemical Pilot Base	R&D Design and Other Technical Services	It will develop a modern comprehensive pilot base integrating R&D, pilot testing and incubation. It serves universities, research institutes and innovative enterprises with end-to-end services from prototype development to process scale-up verification. We welcome pilot projects of fine chemicals, new energy materials and pharmaceutical intermediates from enterprises, universities and research institutes to settle and conduct pilot trials.	3,730	Ningyang Jingkai Pilot Industrial Park Management Co., Ltd.	Yan Tingxin: 18205486811
42	Dongping County, Tai'an City	Commodity Trading Center	Cargo Transportation, General Aviation Operations, Warehousing and Postal Express Services	Dongping sits at the northern end of the navigable Grand Canal, a key hub linking inland western Shandong to national markets. Relying on its water transportation advantage and hinterland industries, the planned commodity trading center will combine material distribution, spot trading, warehousing and supply chain services. It will streamline north-south cargo flows and connect western Shandong ’s bulk commodities to the national market.	2,000	Dongping Binhe Development Group Co., Ltd.	Zheng Hao: 15064159702

43	Huancui District, Weihai City	Yuanyao Shallow Sea Tech Bay Area	R&D Design and Other Technical Services	Yuanyao Shallow Sea Tech Bay Area is located in Sunjiatuan Subdistrict, Huancui District, Weihai City. Centered on the National Comprehensive Marine Test Field (Weihai), it adopts an integrated spatial layout covering offshore, onshore and island areas. It plans a 90 km² offshore test zone, a 270-mu island-based supporting zone and a 1,200-mu shore-based support zone. Two industrial platforms, the International New Materials Innovation Center and the Deep Blue New-quality Equipment Industrial Park, serve as project hosting zones for the bay area. Together they form a coordinated hardware system featuring marine test space, auxiliary support and logistical guarantee. Supported by facilities including the Lanbei Marine Science Center and Lanke Mansion, the bay area hosts multiple high-level research platforms and marine-related enterprises. It has been listed as a provincial digital economic park and a provincial pilot zone for scenario innovation, and strives to become a national benchmark for the marine intelligent equipment industry. Focusing on three leading industries: marine electronic information, marine intelligent equipment, and high-end marine services such as maritime affairs and marine commerce, the bay area prioritizes attracting providers of marine inspection and testing, equipment R&D, offshore testing services and other marine producer services. It aims to build a marine innovation hub integrating offshore testing, inspection & verification, scientific research, enterprise incubation and achievement transformation.	79,700	Weihai Huanhai Investment & Development Co., Ltd.	Wang Fan: 0631-5120697
44	Rushan City, Weihai	Industry-Education Integration Park of Shandong Vocational University of Foreign Affairs	Human resource management and vocational education and training services	The project occupies a land area of 602 mu, with a total construction floor area of approximately 264,000 m². Development will proceed in two phases. Phase I covers 252 mu and features a construction floor area of 156,000 m², while Phase II spans 350 mu with a construction floor area of 108,000 m². The park is functionally divided into five zones: core R&D zone, intelligent manufacturing industrial training zone, low altitude economy industrial training zone, college student innovation and entrepreneurship zone, and public service zone. Centered on industry university research collaboration, it develops a modern innovation platform integrating teaching, scientific research, pilot testing, manufacturing, training and achievement translation. Next, it will focus on introducing testing & O&M, flight training, low-altitude application scenario development, sample pilot testing, e-commerce livestreaming, as well as modern-service start-ups & incubation projects. The park will also introduce supporting institutions for vocational skill certification, industrial research study tours, event operation and producer services.	2,985	Rushan Binhai New Area	Qu Fuxiao: 18763130666
45	Weihai Economic Development Zone	Wisdom Valley Industrial Park	Business Services	Wisdom Valley Industrial Park sits within the core commercial district of Weihai's main urban area. Covering a land area of approximately 516 mu with a total construction floor area of 1.26 million m² and a total investment of RMB 8 billion, it is built as a new economic hub dedicated to fostering emerging industries and pooling high end talent. The park benefits from overlapping policy dividends under the China ROK Free Trade Zone and national service trade innovation pilot programs. A total of 746 enterprises have settled in the park, including 16 Fortune Global 500 companies, 22 listed firms and three research institutes. Investment attraction priorities focus on modern services, modern finance, artificial intelligence and big data, information technology, cross border e commerce and international service outsourcing.	119,403	Weihai Economic Development Zone Investment Promotion Bureau	Yin Zhiwei: 15763146995

46	Weihai Comprehensive Bonded Zone	Cross-border E-commerce Innovation Industrial Park of Weihai Comprehensive Bonded Zone	Wholesale, Trade Brokerage and Agency Services	Located in the south zone of Weihai Comprehensive Bonded Zone, it is the Shandong's first full-mode cross-border e-commerce industrial park. Planned over approximately 1,000 mu with a total construction floor area of around 440,000 m², it is committed to building a full fledged cross border e commerce ecosystem with complete functions, sound supporting systems and reliable safeguards. The park includes six bonded warehouses and seven non-bonded warehouses. It serves cross-border e-commerce operators, general-trade firms and warehousing & logistics enterprises, offering a high-quality physical platform for commercial and logistics players to settle in. It hosts cross-border e-commerce platforms including AliExpress and Coupang, alongside supply-chain and logistics providers, linking upstream and downstream industrial segments for cargo consolidation, warehousing, exhibition, distribution and customs clearance. Leveraging the zone's location advantage of facing the ROK and Japan and covering the whole country, the park develops a Northeast Asia parcel logistics hub. It delivers efficient international logistics channels for cross border e commerce and supports a "multi warehouse linked" cross border logistics system. Future investment attraction targets new forms of cross border e commerce, including cross border livestreaming, cross border new retail and cross border supply chain distribution.	11,940	Weihai Comprehensive Bonded Zone Hongxin Supply Chain Management Co., Ltd. 50	Lanshan District, Rizhao City	DCDC Green Power Direct Connection: Pure Off-grid Low-cost Hydrogen Production Solution	R&D Design and Other Technical Services	Lankun Hydrogen Energy brings its DCDC direct green power hydrogen production technology. Leveraging its self developed wide load, thousand cubic meter class square atmospheric electrolyser, it delivers low cost hydrogen production solutions for large scale wind and solar new energy bases. The green-power side needs no inverter. The DC electrolysis side needs no rectifier power supplies or rectifier transformers, and energy storage systems are not required either. This eliminates a large number of power conversion devices and substantially cuts CAPEX, improving the economic viability of green hydrogen. We invite park developers, new energy investors, and upstream and downstream hydrogen industry players to discuss project landing, joint technology development and equipment bulk procurement to advance the large scale deployment of green hydrogen.	1,493	Shandong Lankun Hydrogen Energy Technology Co., Ltd.	Zhang Hao: 18663325333
51	Juxian County, Rizhao City	Industrial Tech Incubation & Pilot Verification Base	R&D Design and Other Technical Services	The park has partnered with Shandong University and Qilu University of Technology (Shandong Academy of Sciences) to build a chemical pilot platform and provide professional technical, property and other supporting services. It hosts the Green Energy Industry Research Institute of Shandong University, which conducts industrial research on green hydrogen-ammonia-methanol and efficient energy utilization. It welcomes research institutes, universities and enterprises to bring new or to-be-verified technologies into the park for pilot testing, achievement evaluation and industrial verification.	1,284	Shandong Shanke Rongfa Pilot Base Co., Ltd.	Liu Yanchao: 15628602202
52	Lanshan District, Linyi City	Linyi Trade City Global Sourcing Center	Wholesale, Trade Brokerage and Agency Services	Developed by Lanshan Industrial Development Group, the project has a total construction floor area of approximately 62,000 m² and a planned layout of 600 standardized foreign trade booths, with a total investment of around RMB 100 million. Positioned as a foreign trade supply chain hub focused on production materials, it innovatively adopts a "chain leader + chain participant" model under which one storefront links more than ten source manufacturers. Integrating 5,000 to 6,000 local manufacturers from Linyi, it builds a full chain foreign trade ecosystem covering "exhibition – product selection – transaction – cargo consolidation – export". It prioritizes competitive categories such as building machinery, hardware & labor protection supplies, and home goods, aiming to develop a northern international commodity distribution hub. Professional operation teams including Yiwu Yimao Tong International Holdings have been brought in for daily management.	1,493	Linyi Commerce City Development Group (Lanshan Industrial Development Group)	Liu Yongqiang: 13605396662
53	Lanshan District, Linyi City	Lanshan Cross-Border E-Commerce Park Cluster (Lanhua Park & Linyi Trade City Cross-Border E-Commerce Park)	Wholesale, Trade Brokerage and Agency Services	Lanhua Cross Border E Commerce Industrial Park covers an operating area of 50,000 m². It is Linyi's first "Shandong Provincial Pilot Institution for Cross Border E Commerce Incubation and Training". It integrates import/export trade, digital supply chain, cross-border e-commerce, industrial clustering, overseas malls and cross-border exhibitions, covering training & incubation, international logistics, overseas warehouses, financial payment and SBBC bonded platform construction, and already runs overseas malls in the ROK, Malaysia, and other locations. Linyi Trade City Cross Border E Commerce Park focuses on cross border trade, e commerce livestreaming and private domain operation. It delivers one stop services covering "training, incubation, policy support and supply chain matching". Together with the Product Selection Center and International Logistics Park, it forms a closed loop of "product selection – sales – logistics". We are looking for joint cross border e commerce platform operation, and development in overseas warehouses, cross border supply chain finance and digital marketing services.	7,164	Shandong Lanhua Group (in joint operation with Linyi Haide Cross-Border E-Commerce) Linyi Trade City Market Development Group	Lanhua Cross-border E-commerce Park: 0539-8015522, 15966761268

54	High-tech Zone, Linyi City	Linyi National High-Tech Zone Longhu Software Park	Information Service	With a total investment of RMB 870 million, the park is positioned as the city's digital-economy industry incubation base. Centered on the Internet of Things, cloud computing, big data and artificial intelligence, it fosters a "hardware + IoT + software" industrial ecosystem. It is home to more than 300 settled enterprises, including 42 national high tech enterprises and six provincial specialized and sophisticated enterprises. We focus on attracting mid to large software service outsourcing firms, digital creative projects and tech finance projects. The park undertakes the transfer of software outsourcing business from first tier cities and supports joint operation via "university enterprise cooperation plus customized talent training".	12,985	Linyi National High-Tech Zone Administrative Committee; Longhu Software Park Operator	Wang Guangju: 13505396673
55	Dezhou Tianqu New Area	Beijing-Tianjin-Hebei Innovation and Transformation (Dezhou) Center	R&D Design and Other Technical Services	As a carrier for the national Beijing-Tianjin-Hebei coordinated development strategy, the park covers a planned area of 465 mu with a total construction area of 374,300 m². An 86,000 m² comprehensive service and research building has been completed and available for immediate occupancy. It delivers full-cycle incubation support covering "nursery, incubation, acceleration and industrialization", together with customized policy consulting, sci-tech financing matchmaking and listing cultivation services. Benefiting from the one-hour talent circle covering Beijing, Tianjin and Hebei, it adopts flexible talent introduction modes such as "tech vice-president" and "weekend expert". Sixty-one projects including Alibaba 1688 have settled in the park, forming industrial chains for digital economy, modern services and environmental technology, realizing the layout where " enterprises upstairs and downstairs form an upstream-downstream ecosystem ". It prioritizes attracting enterprises engaged in headquarters economy, digital economy and artificial intelligence.	-	Dezhou Tianqu New Area Investment Promotion Department	Zhang Yong: 0534-8100027
56	Lingcheng District, Dezhou City	National Integrated Industrial Big Data Industrial Park	Information Service	The park's computing base hosts 2,712 standard racks and 20,000 m² of IDC space. The 510 PFLOPS "Dezhi Future " Intelligent Computing Center is live, offering rack rental, computing power rental, cloud and data storage services. It links national computing resources through the CENI deterministic network, with over 50% of its power from green sources and round the clock intelligent O&M. Flagship chain leaders including Inspur, China Electronics, Shandong Future Group and Sugon underpin the "computing supply – data processing – AI application – security assurance" value chain. It also features a national data labeling base, industrial funds and university talent pipelines. We are interested in companies in intelligent computing and rack leasing, multimodal data labeling, LLM training, industrial internet, smart governance and integrated source grid load storage.	-	Dezhou Lingcheng District Investment Promotion Bureau	Zhang Shengxi: 18888245321
57	Dezhou Tianqu New Area	Jinjie Yungu	Business Services	Adjacent to Dezhou East Railway Station, the park covers 320 mu with a total construction floor area of 662,000 m². Phase I, spanning 320,000 m², has been completed and is owned by a state owned enterprise with stable property rights. Buildings A1# and A5# each offer approximately 40,000 m² of 22 storey office space, ideal for enterprise headquarters settlement. Building A3# provides 20,000 m² of commercial space for mixed use. The 60,000 m² underground parking garage with 1,215 parking spaces can be retrofitted into new energy service facilities. The park also includes a digital empowerment center, exhibition center and smart city operation hall. Flagship tenants including Hilton Garden Inn, Regus and Hikvision, as well as China Railway Construction Corporation, have settled in. Complete living amenities such as talent apartments and Happy Flower Valley are available on site. We are interested in working with core big data and digital economy projects, licensed financial institutions including banks, insurance firms, securities houses and funds, as well as fintech projects.	-	Dezhou Tianqu New Area Investment Promotion Department	Zhang Yong: 0534-8100027

58	Dezhou Tianqu New Area	Dezhou Digital Valley Technology Park	Information Service	This mature park covers 593 mu. Completed and put into operation in 2019, its overall development has been finished. More than 30 big-data and intelligent technology enterprises have settled here. Six idle enterprise exhibition halls (Buildings 1#, 3#, 13#, 22#, 23#, 25#) are available for immediate occupancy, with a single-floor area ranging from 647 m² to 1,388 m². Fully equipped with water supply, power supply and elevators, they suit office, R&D, exhibition and light operation scenarios. The park comprises 39 buildings with a total area of 42,600 m², including the Sun Wing, Guangming Pavilion and 30 enterprise exhibition halls. The Smart Optical Valley Zone covers 32,600 m², supported by an exhibition & catering center, an academic center and an enterprise center. The 23,000 m² expert apartment complex (Fengdu Hotel) provides accommodation and reception services. The parking lot offers over 2,100 parking spaces including a new-energy charging area, and the canteen can serve 110 diners. It prioritizes attracting technology-based enterprises, high-tech enterprises, high-end talent startup projects and technology commercialization projects.	-	Dezhou Tianqu New Area Investment Promotion Department	Zhang Yong: 0534-8100027
59	Decheng District, Dezhou City	Circular Economy, Green Energy & Auto Industry Cultural-Creative Park	Wholesale, Trade Brokerage and Agency Services	The park holds approximately 48,200 m² of state owned construction land with clear property rights. It is scheduled for completion in December 2026 and to commence operation in 2027. The four commercial complexes (Blocks A, B, C and D) deliver a combined floor area of 59,178.40 m² and can be retrofitted customized to meet tenants ' requirements. The premises support multiple business formats including new vehicle exhibition and sales, used vehicle circulation, high end maintenance, vehicle modification, technical training and cultural experience. Supporting facilities include an integrated photovoltaic energy storage charging platform, dedicated logistics corridors, parking buildings and environmental treatment installations. As a key investment promotion project of Dezhou City, the park provides assistance for business registration, tax filing and policy application. Positioned as an auto industrial and consumption ecosystem covering northwestern Shandong and southeastern Hebei, it prioritizes investment attraction for the whole new energy vehicle industrial chain, alongside low carbon and automotive cultural and creative businesses.	-	Decheng District Investment Promotion Bureau	Guo Yong: 13573455000
60	Liaocheng High-tech Industrial Development Zone	Liaocheng Zhouyu Auto Tech: High-Tech Smart Automotive Industry Project	Wholesale, Trade Brokerage and Agency Services	Focusing on the whole ecosystem of new energy vehicles, the project aims to build an interconnected smart automotive industrial chain. It constructs automobile 4S stores and supporting facilities in Liaocheng High-Tech Industrial Development Zone, including a vehicle maintenance center, functional exhibition halls, office areas, mechanical repair workshops, sheet metal & painting workshops and pre-inspection canopies. It also integrates an auto-themed commercial cluster.	15,224	Liaocheng Zhouyu Automobile Technology Co., Ltd.	Guo Lianqiang: 15306350179
61	Binzhou Beihai Economic and Technological Development Zone	Bohai Advanced Materials Proof-of-Concept Verification and Pilot Maturation Base Project – Application Scenarios	R&D Design and Other Technical Services	The project mainly constructs a proof-of-concept center and pilot maturation base, including an experimental center and pilot plant zones. It makes full use of clean energy such as wind power and photovoltaic power for energy supply. In addition, an industrial investment fund will be set up for fundraising and investment to facilitate the commercialization of pilot achievements.	10,150	Shandong Bohai Pilot Technology Co., Ltd. 66	Dingtao District, Heze City	Dingtao Port Industrial Park Project	Cargo Transportation, General Aviation Operations, Warehousing and Postal Express Services	Dingtao Port Industrial Park is developed to upgrade the New Wanfu River waterway, deliver safe and efficient cargo shipping links and strengthen port hinterland economic connectivity. The supporting Phase II navigation restoration section (Houlou–Guanqiao, 22.55 km, Class III, 2,000 tonne grade, 4.5 m depth, ≥60 m width, ≥7 m clearance) will connect to the Grand Canal and Yangtze River after completion. The park adopts a “one core, four zones” layout: • One Core: Industrial Service Centre. It integrates parking lots, administrative offices, living amenities and rental housing, and develops a mixed use commercial complex with retail, catering, office space and service apartments. • Zone 1 – Port Operation Zone: Berths, production auxiliary facilities and supporting offices. • Zone 2 – Modern Logistics Industrial Zone: A cargo transfer base combining warehousing, distribution and multimodal transport. • Zone 3 – Agricultural and Sideline Products Deep Processing Zone: Focused on deep processing of agricultural and sideline products. It encourages leading agricultural enterprises to extend upstream, builds raw material supply bases, and develops integrated industrial projects covering production, sales and logistics. • Zone 4 – Metal Processing Zone: Leveraging inbound and outbound port cargo, it develops metal processing serving bulk commodities including farm produce, timber, logistics goods and new energy products. The Port Operation Zone sits on the south bank of Wanfu River in Menghai Town, Dingtao District. The supporting port access highway runs across Dingtao District and Mudan District, covering the Gu’an Shatuji (G327) and Ding Meng Road sections. Phase I covers approximately 498 mu (332,000 m²). It is planned to construct two general berths and two multi purpose berths, each designed for 2,000 tonne vessels, together with a 37.8 km port access highway.	70,900	Shandong Taojian Construction Development Group Co., Ltd.
